

# TRAINING

CTC believes in an innovative and high-quality training in order to foster company competitiveness.

We want to provide effective training to the constant changes in the Agri-food Industry areas such as: tests, technology, safety food rules and regulations, the environment, etc. As a result, well trained specialists are able to work in companies having cutting-edge, updated theoretical and hands-on knowledge.

**Training at all levels:** Newly graduates, professionals, update and training for workers, unemployed professionals, trainees, Erasmus.

## WE ADAPT TO YOUR NEEDS:

- **Face-to-Face Training:** theoretical and hands-on courses/day training, international events, seminars, etc.
- **Online Training:** virtual interactive environment shared by students and professors through Moodle platform.
- **In Company Training:** tailor-made courses adapted to company's needs.

## REGULAR TRAINING ACTIVITIES

- Foods Technology and Processing
- Organic Waste Recovery
- Water Treatment
- Microbiology of Foods
- The Environment
- Food Safety
- Instrumental and analytical techniques on Foods
- International Symposium of Foods Technology
- BPCS Better Process Control School (FDA-USA)
- Courses validated by the Administration and Counselling for Agriculture and Water of Region of Murcia. (Consejería de Agricultura y Agua de la Región de Murcia)

In addition, we design tailor-made training adapted to your company's needs or to a related area.

As an organizer of the subsidies of the Fundación Tripartita, CTC can request and administer the subsidies for professional training and lower the costs.
